PROFESSIONAL SUMMARY

Data Science student with a proven track record of building end-to-end data projects — from training OCR models with TensorFlow to automating job pipelines with RapidAPI and SMTP. Proficient in Python, SQL, Tableau, and Power BI, with certifications in Machine Learning and data preprocessing. Looking to bring practical, self-driven experience to a data science internship role.

EDUCATION & CERTIFICATION

Ateneo de Davao University

Davao City

Bachelor of Science in Data Science | GPA: > 3.5

2023-2027(Expected)

- **Relevant Coursework:** Data Visualization, Calculus, Probability and Statistics, Multivariate Statistics, Business Intelligence, Information Management and Databases, Linear & Nonlinear Models, Machine Learning 1 & 2, Data Structures and Algorithms, Algorithms and Complexity

365 Data Science

- SQL + Tableau + Python | Certification ID: CC-F6A01B5617 2025
- Machine Learning Certified | Certification ID: CC-E1718F5F76 2025
- Data Cleaning and Preprocessing with Pandas | Certification ID: CC-F6A01B5617 2025

PROJECT EXPERIENCE

Data Analytics & Visualization Project

2023-Present

Tools: SQL | Python | Tableau | Power BI

- Analyzed real-world datasets using SQL and Python to uncover trends and actionable insights.
- Cleaned and transformed 50,000-1,000,000 row dataset using Pandas, improving dataset quality for analysis.
- Designed interactive dashboards in Tableau and Power BI to visualize KPIs, patterns, and trends.

Text Recognition

Nov 2025

Tools: Python, TensorFlow/Keras, OpenCV

- Developed an OCR model to detect and predict text from blurred images using **TensorFlow/Keras and OpenCV**, improving recognition accuracy through preprocessing and model optimization.
- Applied image preprocessing and feature extraction techniques to enhance text detection performance.

Automating job finding | Rapid API integration

Jan 2026

Tools: Python, RapidAPI, Pandas, SMTP

- Built an automation pipeline that retrieves Data Science internship listings from the Indeed API.
- Structured job listing data using Pandas and exported results into CSV datasets.
- Automated job alert emails using SMTP and scheduled scripts to send updates every 5 days.

Automating File Organization | Python Automation Project

Dec 2025

Tools: Python (os, shutil)

- Created a Python script that automatically categorizes files into folders by type (images, documents, datasets), reducing manual file management.

SKILLS

- | | | | |
|----------------------|---------------------|----------------------|--------------------|
| • Python | • SQL | • Tableau | • Power BI |
| • Excel | • Data Analytics | • Data Preprocessing | • Machine Learning |
| • Data Visualization | • Python Automation | • Web Scraping | • API integration |
| • AI Integration | | | |
